		Rev. 05/29/07		
<p>Note: Re: Music scores in ML or MT (30-33 cm.) ; [Folio] GUAJ ; Folio</p> <p>This was done in order to generate the correct oversize designation in GALIN for Type: c workform materials classed in ML or MT, 30-33 cm. inclusive in their largest dimension, for which there was no piece record attached. At the time, the subfield \$c (not its content, just the delimiter itself) was routinely removed from the 300 field for Type: c materials of this size classed in ML or MT, so the only place in the bib.</p>
