

## Get References from EBSCOhost Databases in GALILEO®

EBSCOhost supplies many of the GALILEO® databases. Their search screens look similar to the ones shown here. The following examples use Academic Search Premier.

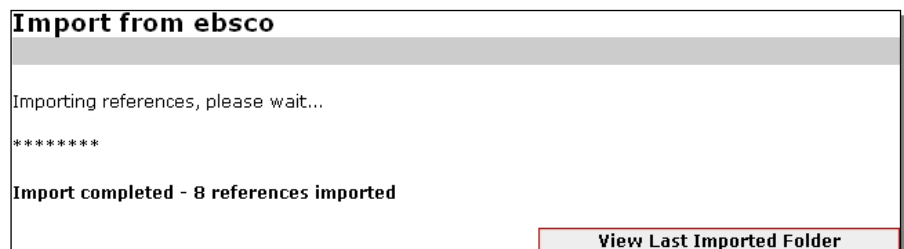

Conduct your search in the EBSCOhost database of your choice. Click *Add* to select your citations. When done, click on *Folder has items*. Click on *Save to Disk*. On the *Save Manager* screen click on the *Bibliographic Manager* tab.

Select the radio button for *Direct Export to RefWorks* then click the *Save* button on the left side of screen.

The EBSCOhost database opens RefWorks. Enter your *Log-in Name* and *Password*. Click *Login*.

The EBSCOhost database exports your references directly into the *Last Imported* folder in RefWorks. Click *View Last Imported Folder* to **move them** into another folder.

References left in *Last Imported* will be copied to *References Not in a Folder*, and overwritten the next time you import. Move them to one of your other folders.
